SUMMARY

Full Stack Web Developer with a creative and design-oriented perspective. Graduated with dual majors in Computer Science and Graphic Design in 2023. Earned a certificate in Full Stack Web Development through The Ohio State University. Tinkerer and computational thinker who puts the user at the forefront of development. Team player and passionate coder with a dedication to lifelong learning. Strengths include focus, organization, and curiosity.

TECHNICAL SKILLS

Bootstrap • CSS • HTML • JavaScript • TypeScript • React • React Native • .NET • Node • Express • Python • MySQL Server • Entity Frameworks • PostgreSQL • MongoDB • Mongoose • GraphQL • GitHub • Azure DevOps • Restful APIs • Vite • MVC • LucidChart • Agile

RELEVANT EXPERIENCE

Junior .Net Developer

2023 – 2025

The Provato Group

Remote

Sole developer dedicated to designing, coding, and troubleshooting new custom enterprise web-app for centralizing in-house processes and information. Azure DevOps, .NET, Entity Frameworks, MVC, LucidChart, MySQL Server.

Key Accomplishments:

- Developed key features for a custom enterprise web application, including new hire process automation, tracking, and relationship management between employees, clients, products, and more.
- Single-handedly designed and implemented new Controllers, Models, Views, ViewModels, migrations, configurations, and service files to enhance the functionality of the enterprise web application.
- Designed and established new database entities and relationships based on ER diagrams.
- Utilized Azure DevOps to identify, track, and resolve bugs and issues using Agile methodology.
- Managed and prioritized problem resolution by recording and organizing bugs in Azure DevOps Boards.
- Developed multiple Microsoft Power Automate flows triggered within the enterprise web application to streamline repetitive tasks, such as sending mass customized emails and automating hiring processes.

Software Developer Intern
GPRS

2023 – 2024
Maumee, OH

Developer dedicated to patching issues using function and console apps. Designer dedicated to reworking outdated designs. Azure DevOps, .NET, PostgreSQL.

Key Accomplishments:

- Developed a function app to resolve database duplication issues.
- Created, tested, and implemented a function application to map and import XLSX spreadsheets into the database, streamlining data integration from other company departments and saving developer time.
- Created, tested, and implemented a console app to map and import csv spreadsheets into the database.
- Designed an optimized website login process in Figma to enhance user experience and reduce login time.
- Designed enterprise software in Figma for tracking subscriptions and managing relevant data, improving business operations.
- Developed a Figma prototype for an online file storage system aimed at reducing clutter, enhancing organization, and improving user experience.

Intern
VESST

2022 – 2023
Remote

Developer dedicated to debugging and implementing new requests from clients. React Native, JavaScript, CSS, HTML, Firebase.

Key Accomplishments:

- Conducted thorough testing and debugging to improve application functionality and optimize user experience.
- Collaborated in the development of a new application for local school sports teams centralizing communication, scheduling, and statistical tracking.
- Implemented new features to expand the capabilities of existing applications, improving service offerings and user functionality.
- Implemented changes from client change requests, which ranged from UI/UX modifications to reworking entire features.

EDUCATION

Certificate in Full Stack Web Development

The Ohio State University

Columbus, OH

Bachelor of Arts in Graphic Design
